Please let us know if you can attend. If you would like to join by telephone, let us know and provide a suitable number to contact you.

Your contact for this case conference is:

Name of staff member: _____

Role: _____

Telephone: _____

On the next page you will find information on palliative care and palliative care case conferences

Invitation for you and your family

Palliative care case conference

Case conference: Case conferences or family meetings are an opportunity to discuss a person's care needs. They ideally include the person (if able to attend), their family and/or their substitute decision-maker, and members of the care team including the doctor.

Palliative care: Palliative care is person- and family-centred care that supports a person to live the best life they can with a life-limiting illness. This means that the person has little or no prospect of cure and is expected to die. The focus is on quality of life.

Common care issues in palliative care include:

- pain
- dyspnoea (breathing difficulty)
- dysphagia (difficulty swallowing)
- constipation/incontinence (bowel and/or bladder management)
- depression
- delirium (sudden confusion)
- anxiety
- nausea (feel that you want to vomit)
- fatigue (tiredness).

Who should attend a case conference?

If possible, the person receiving care should attend, their GP, the broader health team e.g. allied health, and where appropriate the care partner and/or registered supporter.
